Q & A

The logo for Memory Lab at DC Public Library. The word "Memory" is in a blue, lowercase, sans-serif font. The letter "m" is stylized with a white eye-like shape inside the top curve and a white vertical bar with a dot inside the stem. The word "Lab" is in a bold, black, uppercase, sans-serif font. Below "Memory Lab" is the text "DC public library" in a black, lowercase, sans-serif font.

Memory Lab

DC public library

<http://www.dclibrary.org/labs/memorylab>

Origin Story

- Public demand for digitization, but we want to do more than provide scanners
- Partnership between Special Collections (digital preservation & archives expertise) and DCPL Labs (digital education and tools)
- National Digital Stewardship Resident Jaime Mears - June 2015 to May 2016
 - (blog at jaimemears.wordpress.com)
- Result: Memory Lab digitization lab, resources, and classes

The Place – Digitization Lab

- VHS
- VHS-C
- DV
- MiniDV
- Audiocassette
- 3.5" Floppy disk
- Photo/document/slide/ negative scanning

1712

lab hours used by the public since opening February 2016

FAQ

When can I sign up?

Booking will go live on 2/17. Reservations can be made for Monday, 2/22 and on.

What formats can I digitize?

The formats we accept currently are listed in the Table of

The Programs

Classes

- Digital Preservation 101
- Digital estate planning
- Digital archiving and social media

Events

- Home Movie Day
- DC Zinefest
- Preservation workshops

Staffing and Sustainability

- Labs staff manage appointments, troubleshoot equipment, teach classes
- Memory Lab working group
- 65 DCPL staff have participated in digital preservation professional development over 2 years

We're growing!

- At DCPL: More and mobile Memory Labs
- Going national!
 - 2 year IMLS National Leadership Grant
 - Training, mentorship, and seed money for **7 public libraries** across the U.S.
 - Application period for in the fall
 - Expand and improve the Memory Lab model

Tactics for Community-Engaged Video Preservation

A brief intro to the XFR Collective

by Rachel Mattson

archivist/historian

core XFR collective member since 2014

*DLF Webinar on Low-Cost, DIY, and Community-Based Approaches to Audiovisual Digitization
June 2017*

XFR Collective is a non-profit organization that partners with artists, activists, individuals, and groups to lower the barriers to preserving at-risk audiovisual media – especially unseen, unheard, or marginalized works – by providing low-cost digitization services and fostering a community of support for archiving and access through education, research, and cultural engagement.

2 WHY THE INTERNET ARCHIVE?

Text from the XFR STN lab/exhibit, New Museum, 2013.
(The XFR Collective evolved directly out of this exhibit.)

The act of digitization or data recovery itself is not preservation, but only the first step in a responsible plan. Once an artist's work is recovered from obsolete media—be it a VHS cassette or a floppy disk—these bits must now be inscribed on a new storage medium. The spinning disk of a hard drive is a tenuous and temporary data carrier. If artists left “XFR STN” with nothing more than their recovered materials stored on a portable hard drive, we would truly be doing them a disservice. We would fail to meet digital preservation best practices by storing culturally and personally valuable content on an unstable carrier, and not providing any sort of redundancy or duplication. However, it would not be feasible or sustainable over the long-term for the New Museum to take on the responsibility of storing the terabytes of data that will be produced as a result of “XFR STN.” As a solution, the New Museum has partnered with the Internet Archive to make all materials recovered as part of the exhibition available to the public. Subscribing to the dictum that Lots of Copies Keeps Stuff Safe,¹ we embrace the notion that distribution itself is a preservation strategy.

the Mad Information Scientist in:
RECOVER ANALOG
and **DIGITAL DATA!**

DOROTHEA SALO

an **[iSchool]** adventure
in **5** action-packed minutes!

When we left the
MAD INFORMATION SCIENTIST
last episode...

LIS 668, Digital Curation

School of Library and Information Studies
University of Wisconsin-Madison
Spring 2015

Dorothea Salo (please call me "Dorothea")
Office address: 4261 Helen C. White Hall
Course link page: <http://pinboard.in/u:dsalo/t:668>

salowisc@wisc.edu, 608-265-4733
Office Hours: by appointment

Course Objectives

- Assess, plan for, manage, and execute a small-scale data-management or digital-preservation project.
- Assess digital or to-be-digitized data for preservability; make yes-or-no accessioning decisions.
- Appropriately manage intellectual-property issues related to data management and digital archiving.
- Understand (and where relevant, apply) technological, economic, and social models of digital preservation and sustainability.
- Understand forms, formats, and lifecycles of digital data across a wide breadth of contexts.
- Evaluate software and hardware tools relevant across the data lifecycle.
- Construct a current-awareness strategy; assimilate substantial amounts of relevant writing.
- Self-sufficiently acquire technical knowledge.

This course is designed to assess student progress in the following SLIS program-level outcomes: 1b, 2a, 2b, 3a, 3b, 3d, 4a, and 4b.

Course Policies

I wish to fully include persons with disabilities in this course. Please let me know within two weeks if you require accommodation. I will try to maintain the confidentiality of this information.

Academic Honesty: I follow the academic standards for cheating and plagiarism set forth by the University of Wisconsin.

California's audiovisual
history available for **free**.*

Why now?

Essential Preservation Steps

Inventory

Describe

Digitize

Quality Assurance

Preserve

Access and Outreach

Essential Preservation Steps

Inventory (and assess value)

- What do you have?
- What will you have?
- Where is it?
- Assess as you inventory
 - Consider value – historical significance and potential use
 - Consider physical condition and threat of obsolescence
- Partial inventory is a good start
- Inventory is the basis of a catalog
- Use an excel spreadsheet!

Essential Preservation Steps

Describe (keep it simple)

- *Do NOT attempt playback for identification!
Gather what you can from the recording itself
- *Enhance description after digitization

Minimal fields

- Title
- Date
- Generation (duplicate vs. original)
- Format – for budget
- Maximum size/length/duration (include total number reels/tapes) – for budget

- Creator(s)
- Description – labels/paperwork/other clues as to content
- Copyright status
- General notes – condition (red flags) and assessment (prioritize)
- Location

Essential Preservation Steps

Inventory and Describe: Free tool

AV Compass

<http://www.avcompass.bavc.org>

- Free, easy to use, online form
- Exports data into a CSV file
(readable as a spreadsheet)
- Site includes fun tutorial videos

This free online resource from the Bay Area Video Coalition will give you direction in organizing, preserving, seeing and appreciating *your* audiovisual collection. From the unruly media room of your archive to the small box of tapes sitting in your home collecting dust, AV Compass will provide the basic tools you need to move forward in saving your films, tapes, discs and files for the long-term.

To explore instructional videos and written guides, click the 'Learn' link below. To create a free account and start inventorying and organizing your collection(s), click the 'Inventory' link below.

WHAT DO YOU WANT TO DO?

LEARN ABOUT
AUDIOVISUAL
PRESERVATION

INVENTORY
MY
COLLECTION

Essential Preservation Steps

Digitize (outsourcing)

Good vendors bring

- less “real time” staff cost
- expertise and professional, clean, calibrated equipment
- established preservation quality procedures and standards
- guidance on file naming conventions, destination formats
- 1:1 and/or batch transfer options

**Don't be afraid to ask the vendor questions.
You're building a relationship!**

Essential Preservation Steps

Quality Assurance

Basic checks

- technical specifications
- image quality at beginning, middle and end (at least 10% of running time)
- metadata
- run checksums
- confirm image and sound quality are adequate for patron use
- confirm content corresponds to descriptive metadata

Essential Preservation Steps

Quality Assurance

Tips

- It takes practice to learn how to differentiate original analog look/sound/feel from digital look/sound/feel and how to determine if artifacts could have been introduced during the transfer process (in your best estimation).
- Consider intern or student help (for first and/or second pair of eyes and ears).
- Use free tools to help automate the process.

Essential Preservation Steps

Quality Assurance: Free tools

md5tool – generates and checks checksums

<https://github.com/cavpp/md5tool>

verifymedia – checks technical specs of files

<https://github.com/cavpp/cavppers/blob/master/verifymedia>

QCTools- helps analyze and understand digitized video files through analytics and filtering

<https://github.com/bavc/qctools>

AV Artifact Atlas – helps identify errors and anomalies – inherent or introduced - in analog and digital video

<https://bavc.github.io/avaa>

Thanks!
